Mr. Thomas C. Settles, President
Omega Paving & Construction Management Group
555 Ralph McGill Blvd.
Atlanta, Georgia 30312

Dear Mr. Settles:

Please accept this testimonial as a letter of support on the effectiveness of your product **Pave-ZYME (PZ 22-X)** in stabilizing the soil on roads in Hinds County.

In October 2007, the product was used on a road in Hinds County that was previously a collapsed bridge. Instead of replacing the bridge, the decision was to insert (3) 72-inch culverts in a huge (12 ft) hole that the bridge previously supported. After a period of time where the culverts were installed, the road collapsed again. We decided to experiment with the **Pave-ZYME (PZ 22-X)** as a back fill agent to re-install those (3) 72-inch culverts and built a 12-inch base at the bottom of the 12 ft hole. We then hauled in about 20 dump truck loads of clay. As each load of clay was dumped into the 12 ft hole we sprayed **Pave-ZYME (PZ 22-X)** with a hose running from a water truck on the clay that was being dumped from the truck over the (3) 72-inch culverts. A hand packer was used to compact the **Pave-ZYME** treated clay around the (3) 72-inch culverts. The top 12 inches of the road was treated with the **Pave-ZYME** as a final application over the culverts. We have now paved over those (3) 72-inch Culverts and the road has been re-opened for over a month now. We are very satisfied with this product for the above mentioned application.

I look forward to a continued and productive relationship between Hinds County and Omega Paving & Construction Management Group, LLC as we strive to improve the Quality of Life for the Citizens of Hinds County and the State of Mississippi. If you have any questions, please call me at (601) 857-8732.

Sincerely,

George Martin III
Director Hinds County Public Works
