

OMEGA PAVING

& CONSTRUCTION MANAGEMENT GROUP, LLC

"In our day, the most important symbol of getting out of poverty was living on a paved road"

Ambassador Andrew Young introducing Omega's "Roads out of Poverty" initiative to representatives of the Jamaican government at an Atlanta assembly

Product License and Manufacture

"PZ-22X" is the licensed private label of a trade secret protected product known as PZ-22X manufactured by Worldwide Enzymes. Omega has exclusive marketing and distribution rights to PZ-22X for the 50 states of the United States, the Caribbean and most nations in Africa.

"PZ-22X," the name of the product represented by Omega, has obtained increasing acceptance and is being investigated as a rural roads solution by the Southern Rural Transportation Center of South Carolina State University. PZ-22X has been approved by the Alabama Department of Transportation for use on Alabama roads.

OMEGA converts unimproved dirt roads into highways for progress.

Paved rural roads better the condition of the poor by improving access to essential services - schools, hospitals, government, etc. and by facilitating the transport and sale of agricultural goods which both contribute to the overall economic progress.

Use cost-effective PAVE-ZYME (PZ-22X) to eliminate rough, rutted, and dangerous high maintenance dirt roads.

Roads out of poverty.....
Roads to Progress

Dirt roads upgraded with PAVE-ZYME (PZ-22X) require no routine maintenance, eliminate the need to lay repeated loads of gravel to keep roads passable in wet weather, reduce dust, increase load bearing capacity and eliminate water infiltration, potholing and wash boarding.
